

Homegrown National Park is inspired by [Doug Tallamy](#), and implemented by a “retired” marketing maven. This is an easy, fun way to help pollinators (birds and bees, among others) plus frogs and turtles. Regenerate biodiversity, one person at a time. This project will provide habitat for pollinators and keep local ecosystems viable.

“In the past, we have asked one thing of our gardens: that they be pretty. Now they have to support life, sequester carbon, feed pollinators, and manage water.” — DOUG TALLAMY
