

I believe Laura Parmer-Lohan is the best candidate for San Mateo County Supervisor, District 3.

I saw her speak at a recent forum. She was the most thoughtful candidate on the issues of climate change, fire prevention, and sea-level rise.

She is committed to protecting beaches, open spaces, and forests for future generations. She is a proponent of using recycled/reclaimed water for irrigation, farming, and landscaping to address severe drought, and will tackle climate-induced flooding and sea-level rise.

In fact, she has been endorsed by local firefighters for her vision to fund year-round investment in wildfire prevention.
