

MASK THE COAST PROJECT

Thanks to all 31 sewing enthusiasts and four drivers who have participated. Out yourself only if you care to. Attached is a photo of the miracle filter fabric SCOTT HEAVY DUTY. All 31 of you have a new package at your door with this material plus another fabric that is softer on your face. Sandwich two layers of the blue towel between the fabric of your choice. I read a hundred articles last night and tested 18 products. Suffice it to say I have a lot of lights and cameras you don't have but compare it to coughing into the bright sunlight and seeing all the "sparkles" in the air. I found this product on a Business Insider article and it was one of many, many products I tested last night. These filters are durable when sandwiched, washable, DO NOT PUT THEM DOWN YOUR TOILET FOR ANY REASON.
