

Peninsula Clean Energy Funding New San Mateo County Electric Vehicle Chargers

***\$248K for 124 EV charging ports under construction in
county parking garage***

REDWOOD CITY, CA – April 20, 2021 – Peninsula Clean Energy is providing up to \$248,000 to the County of San Mateo to install 124 electric vehicle charging ports in a new county government parking structure.

The funding is the first – and likely will remain among the largest for any single project – under Peninsula Clean Energy’s [EV Ready program](#), which aims to install 3,500 charging ports in San Mateo County over the next four years.

The 124 EV charging ports will be available to county employees – and may in the future also be available to the public on evenings and weekends – as part of the county’s new Government Center Parking Structure in Redwood City that is expected to be open by this fall. The structure is built to incorporate next-generation green design and technology, including the ability to potentially install hundreds more EV chargers thanks to technical and other assistance Peninsula Clean Energy has provided.

"The County has committed to achieving carbon neutrality from its operations by 2035," said **David Canepa, president of the San Mateo County Board of Supervisors**. "Installing EV chargers is one of many investments that will need to be made to transition our polluting gas vehicles to clean electric vehicles. The partnership with Peninsula Clean Energy is helping the County make deep emissions reductions."

“This is a fantastic example of public agency leadership and just a taste of the potential for EV charging deployment in San Mateo County,” **Peninsula Clean Energy CEO Jan Pepper** said.

“Electrifying our vehicles is central to reducing our transportation-related emissions and our larger mission of mitigating harmful climate change.”

About Peninsula Clean Energy

Peninsula Clean Energy is a Community Choice Aggregation agency. It is the official electricity provider for San Mateo County and, beginning in 2022, for the City of Los Banos. Founded in 2016 with a mission to reduce greenhouse gas emissions in the county, the agency serves 295,000 customers by providing more than 3,500 gigawatt hours annually of electricity that is 100 percent carbon-free and at lower cost than PG&E. As a community-led, not-for-profit agency, Peninsula Clean Energy makes significant investments in our communities to expand access to sustainable and affordable energy solutions. Peninsula Clean Energy is on track to deliver electricity that is 100 percent renewable by 2025. The agency has earned investment grade credit ratings from Moody’s and Fitch.
